SUMMARY

I am a Front-End Developer who loves to design and create beautiful, user-friendly web applications with the help of HTML, CSS, JavaScript, ReactJS, TypeScript or Next.js. Skilled in making responsive websites, with an accessible user experience and interactivity, driven by a foundation in web development, and dedication to skill improvement. I have experience with using state management libraries (Redux and Zustand) and optimizing for performance to ensure smooth operation of the application. And of course, to keep myself aware with any industry trends & best practices, to deliver a clean, maintainable and scalable code. I am very communicative and always want to find a solution to smart problems and develop great digital works.

SKILLS

Technical Skills: HTML, CSS, JAVASCRIPT, TYPESCRIPT, REACT, REDUX, ZUSTAND, GIT, VUE AND NEXTJS

EXPERIENCE

Front-End Developer Intern

Peanon

June 2023 - July 2024, Nigeria, Lagos

- Built Interactive User Interfaces: Creating Responsive web pages as per design using HTML, CSS, and JavaScript for optimal experience across devices and browsers.
- Component Development with React and Vue js: Built reusable React and Vue components across applications js to make the code more modular and scalable.
- TS Integration: Introduced TypeScript for Typesafety and easier code maintenanceQWidget
- Contribute — Work alongside senior developers in-code reviews and team meetings to plan & execute new features.
- Debugging & Optimization — Identified and fixed the root of performance bottlenecks to increased web page load times & user experiences.
- Worked with senior developers to develop mobile friendly web-pages using HTML, CSS and Java Script (resulting in a 20% increase in website user engagement over 3 months)
